PROFESSIONAL SUMMARY

Senior UX/UI Designer - Interaction & Visual Design for FinTech, Payments & AI Products

Interaction designer with 6+ years in UX and product design across FinTech, enterprise SaaS and mobile apps for iOS and Android. I bring a systems-level, strategic design thinking approach to ambiguous, early-stage problems: researching with users, turning complex systems into clear stories that align product owners, engineers and leadership, and using AI to prototype faster. Most recently I designed a payments and billing platform for finance teams in India. An engineer's precision, a designer's curiosity and a constant advocate for users.

CORE SKILLS

Interaction Design, Visual Design, Product Design, Systems Thinking, Design Thinking, Payments & FinTech UX, Mobile App Design (iOS & Android), User Research, Usability Testing, AI-assisted Prototyping, Information Architecture, Journey Mapping, Design Systems, Storytelling & Presentation, Cross-functional Collaboration (designers, researchers, engineers, product), Stakeholder Alignment, WCAG 2.1 AA, Agile.

PROFESSIONAL EXPERIENCE

Info Services, Chennai Aug 2022 - Present
Senior UX/UI Designer | Enterprise SaaS, FinTech & AI Products

- To align product decisions with business goals, led UX strategy linking research to outcomes, raising project efficiency by 25%.
- To speed up engineering handoffs, built a scalable Figma design system with Auto Layout and Components, cutting iteration 40%.
- Faced with slow task completion, designed AI-integrated workflows with a clearer hierarchy, improving completion time by 32%.
- To meet WCAG 2.1 AA, drove compliance across the platform, raising accessibility scores and stakeholder confidence.
- To choose between competing interaction patterns, ran A/B tests and adopted the stronger ones, improving task efficiency by 15%.

MacApp Studio Jul 2020 - Aug 2022
UX/UI Designer | Mobile & Web Product Design, Healthcare SaaS

- Designed Speed Care, a hospital SaaS product with Doctor and Patient mobile apps and 7 role-based dashboards.
- Designed Check-In/Check-Out and the patient journey across Consultation, Labs, Pharmacy and Ambulance, speeding up care.

Madura Digitals Jan 2019 - Jun 2020
Graphic Designer | Visual design, branding and digital design, building the aesthetic foundation for product work.

Sundaram Clayton Jul 2017 - Jul 2018
Engineering Apprentice | BMW RR 310 engine line, where I learned the precision and quality I bring to design.

PROJECTS

Billora AI - FinTech Payments & Billing Platform 2026
Invoicing, payments and bank reconciliation for finance teams in India (INR & USD, GST), across 6 user roles.

- Drove an early-stage effort from a PRD: interviewed HR and finance teams, mapped current and future-state systems, and partnered with a product owner, engineers and QA on one seamless, secure flow (role-based access, audit trail) from hours to payment.
- Used AI to prototype faster, vibe-coding an interactive front end in ~3 months; stakeholder feedback on the demo cut 8 roles to 6 and set the roadmap toward lump-sum payment reconciliation.
- In UAT on real invoices: ~60% faster invoice prep, ~90% fewer calculation errors, 48h sign-off, ~80% of bank payments auto-matched.

Tractor Connect 2.0 (KIOTI) - Mobile App 2025
Connected-tractor app for iOS and Android across the US, Canada and South Korea. Lead UX Designer, ~12 weeks.

- With a UX research consultant, ran 6 research methods yielding 7 findings, then designed 27 screens and a visual design system (colour, type, spacing, icons) that turned raw fault codes into plain language for farmers (average age 58).
- Agreed success targets with stakeholders before testing, then met all of them in 9 sessions: 88% task completion and SUS 81.

Bakery Order Operations (Shatila) - AI Staff Dashboard 2026

- Navigated ambiguity with no research budget through lean discovery with staff; designed AI order intake from email, fax and the web, with confidence scores and human review, across 10 screens prototyped in Figma Make.

EDUCATION

Bachelor of Science (B.Sc.) in Information Technology - Alagappa University 2022
Product Designing - Design for Change 2024
Diploma in Mechanical Engineering - PSN Polytechnic College | UI/UX Course - J Spider 2016, 2018

SKILLS

Design Tools: Figma, Adobe XD, Sketch, Photoshop, Illustrator, After Effects, Premiere Pro, Miro
AI Prototyping Tools: Claude Code, Claude Design, Cursor, Lovable, Vercel v0, Figma Make, Framer AI, Uizard, Galileo AI
AI Research Tools: ChatGPT, Maze AI, Dovetail AI, Hotjar AI, Stark
Soft Skills: Communication, Presentation, Storytelling, Stakeholder Management, User Advocacy, Acting on Feedback, Empathy
Languages: English (Professional), Tamil (Native)

I'm available for a portfolio walkthrough and design discussion at your convenience.
